

Random Notes

The CBC Radio network is carrying a weekly advertisement of the late H. G. Wells' great novel, "Tono-Bungay."

In itself, this is a confirmation of the consensus of critical opinion which places this work in the forefront of all the many stories that poured from the prolific pen of this author of a previous generation.

It is true the story is dated; that to some extent it is anachronistic; yet it has the undoubted advantage that it presents a phase of life that was particularly English. No one could visualize such events taking place in Scotland; still less in Ireland.

Uncle Ponderoso, the small village chemist who moves to London and who, after a while, patents an infallible tonic, Tono-Bungay, is the character who visualizes such events taking place in Scotland; still less in Ireland.

Uncle Ponderoso, the small village chemist who moves to London and who, after a while, patents an infallible tonic, Tono-Bungay, is the character who visualizes such events taking place in Scotland; still less in Ireland.

Anyhow, with this initial victory and assisted by his nephew, George, Uncle Ponderoso is a great success.

Canadian Legion, No. 61

Mrs. Margaret Allen, formerly of the Ladies' Auxiliary, receives Life Membership.

At the Annual Meeting of the Canadian Legion, branch 61, Delta, Comrade Margaret Allen (better known to the veterans as Peggy Allen) was presented with a life membership in the legion, by Comrade Bill Newman.

Mrs. Allen was a nurse with the R.A.M.C. in World War I, and came to Canada in 1918, settling in Delta.

Since then she has interested herself in the welfare of veterans and their families.

During the depression years and until the fall of 1935, she turned her home into a day-care center for underprivileged children, and she had many more than she was helped out by willing neighbors.

During World War II she served in the C.O. Belcher hospital until 1944, when she moved to Vancouver; there she joined the Red Cross Corps, and was conducting nurses with the British Columbia Red Cross Corps.

Mrs. Allen was the first provincial president of Ladies' Auxiliaries; also president of Delta and the Calgary Branch, No. 88. Burnaby elected her as 3rd Vice-president, the first woman to have been elected by the branch.

Imperial Oil Limited

Leduc 10th Anniversary Celebration Feb. 13

John R. White, President of Imperial Oil Limited, will be the guest speaker at a banquet highlighting the one-day "Leduc 10th Anniversary Celebration" at Edmonton's Macdonald Hotel on Wednesday, February 13th.

Leading Canadian oilmen along with representatives of other major Canadian industries and high ranking government officials will gather to commemorate the discovery of crude oil at Leduc.

Activities of the Leduc 10th Anniversary Celebration are being co-ordinated by the Canadian Petroleum Association. Representatives of the Alberta government, the City of Edmonton and the province will be among those participating in the program.

SEEDTIMES

Harvest

A feature of grain farming in Western Canada is to alternate grain crops with summerfallow. The main object of this practice is to build up a moisture supply by reducing or eliminating weed growth. Clean, bare fallow is, of course, subject to soil erosion by wind and water. On the other hand, the use of stubble-mulch (straw cover) after a Prairie Province wheat crop, and the use of a similar system and moisture loss but it is an effective means of soil conservation.

The question then is "Can we reduce the effectiveness of a stubble-mulch system?"

Experiments have been conducted by the Wyoming Agricultural Experiment Station, and the results show that various summerfallow methods using water table. Of several fallow periods tested, the application of weed-killing chemicals on stubble-mulch was found to be the most effective. The use of chemicals on stubble-mulch was found to be the most effective.

NO RESPONSE

People seem to arrive at an early party (celebrations with intention of being instructed and entertained, rather than with intention of having out some new question for their minds to chew upon.

PRINCESS ALEXANDRA, cousin of the Queen, celebrated her twentieth birthday on Christmas Day. She is the daughter of the Duchess of Kent.

DUCHESS OF KENT—This portrait of the Duchess of Kent was made by Cecil Beaton at Kensington Palace, London, to mark Her Royal Highness's 50th birthday anniversary. The Duchess wears a grey chignon gown, diamond tiara, diamond earrings, three-strand diamond necklace, the Royal Family Orders (the Queen King George VI and King George VI) and the Blue Ribband of the Grand Cross of the Royal Victorian Order.

THEIR OBJECTIVE—MARRIAGE—John Monck, 26, and Margaret Macgregor, 25, Monck's relatives, as they arrived to Saint John, N.B., aboard the liner *Shagbush* on Friday. They intend to marry in N.B. about the time *Shagbush* returns. They hope to wed in their new home.

THIS CURIOUS WORLD

QUOTING "ODDS"
"A TRIN AIR" BE HELD UP WITHOUT BEING LIFTED! (See BUZZ BLASTING, *Illustration*, New York.)

THE EARTH'S BIGGEST GLASS!

POCKET GOGGLES
WHEN IN THE BUDGET, GO BACKWARD WITH BUCKLE-BASE.

IN THE EAST INDIAN ISLAND OF KRALATOA BLEW UP ON AUGUST 27, 1935. 36,000 LIVES! LOSE THEIR LIVES! YET THERE WAS NOT A SINGLE LARVE TOWN WITH A HUNDRED BULBS! THE SECOND WIVES WERE RESIGNED 5000 LIVES AWAY, AND OTHER NAMES WERE BLAZED ON THE SHORES OF FOUR CONTINENTS.

EARLIEST STEAMBOAT

The earliest steamboat was built in France in 1780. Robert Fulton's Clermont began regular service in 1807. The first trans-Atlantic steamer, The Great Western, made its initial crossing in 1839.

Know your baby-sitter

- The baby-sitter! Here are some helpful suggestions from the National Board of Fire Underwriters:
1. Know the sitter. Make inquiries about training and family background.
 2. Employ only sitters who have a sense of responsibility and who like children.
 3. Try to have the same sitter regularly, if possible, and one who lives nearby.
 4. Have a preliminary "get acquainted" interview with sitter. Acquaint the sitter with children and pets, especially the watchdog.
 5. Give instructions orally and leave them in writing.
 6. Show sitter all exits and how to get children out of house in case of fire.
 7. Be sure sitter understands that, in the event of fire, the children should be gotten out of the house first, then the fire department called, and then the parents notified.
 8. Give the sitter the telephone number of the fire department, family doctor, and place to which you (parents or adult members of the family) are going. Also, what neighbors to call in the event of any emergency.
 9. If there is no phone, explain to sitter other means of notifying fire department in case of a fire.
 10. Caution sitters against permitting child to play with matches, electric cords, or other electric appliances. Also, tell sitter to keep the child out of the kitchen, if possible.
 11. If sitter is to bathe younger, make certain she has had such experience.
 12. Leave a first aid kit with sitter and explain how to take care of simple burns, cuts, bruises.
 13. Provide flashlight for use in case lighting should fail.
 14. Always come home at the hour agreed upon. Telephone if delay.
 15. Make suitable and safe arrangements for accompanying the sitter home.

Canadian statistics report

(A Weekly Review)

Agriculture: Cattle income is estimated for the first nine months this year at \$1,774,500,000, higher by 11 percent and 12 percent than for the comparable periods of 1933 and 1934 respectively, but still substantially below the 1933 record figure. Gains from sale of grain, cattle, calves, poultry and eggs accounted mainly for the overall rise from 1933, with wheat responsible for more of the increase than any other commodity. Most of the total increase was in the Prairie Provinces.

Transportation: Railway car loadings were under 1 percent larger for the first week of December than a year ago, but the cumulative gain for the year stood at a substantial 9 percent.

Mineral: New copper production to the end of October was 13 percent larger than in 1933, nickel output up over 2 percent.

Crude petroleum: Production for all Canada was over a third larger to the first nine months this year than last. Natural gas sales jumped nearly 21 percent in September over a year earlier and about 30 percent in the nine months.

Manufacturing: Manufacturers' shipments climbed in value during October over September and were 12 percent above October last year. Cumulative total was up a similar 12 percent over 1933. October's new orders and unfilled orders were over 12 percent and 6 percent above in year comparison. Pulp and paper output and another series of products during 1933 and 1934 indicate a further gain over 1933 for the first 21 months of this year. The output of steel in 1935 was smaller than 1931, although total consumption was close to the 1933 record.

Merchandise Traffic: Foreign vehicle entries reached a new high for the month in November, but the 21-month total still lagged behind 1933.

Helpful Hints

Are you constantly worried out from stacking at the bank? Then rubbing paraffin on the top surface of your phone may help.

When drilling through masonry with a hammer and a steel drill, estate the drill a quarter inch of for each blow from the hammer. This helps the drill to cut faster and prevents it getting stuck in the masonry.

To figure the amount of surface to be covered with paint, measure the front area and multiply by 7. Using the same color of paint as used for the wall behind the radiator will tend to make the radiator the least conspicuous.

Traffic Control a Must Air Safety Their Aim

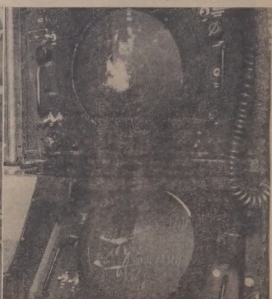

In addition to a regular flying licence, all aircraft captains are required to hold an instrument rating obtained after the most rigid of check flights. Last minute contact with the control tower is made through a two-way radio in preparation for the take-off.

Besides airport control towers, there are 7 major control centres in Canada at Gander, Moncton, Montreal, Toronto, Winnipeg, Edmonton and Vancouver. Before an instrument flight can take off from any airport, clearance must be obtained from an area control centre as well.

The approach controller's radius is from 10 to 40 miles from the airport. He charts arrivals, departures, and flights overhead transmitting instructions to aircraft by pulling a selector key for the proper radio frequency or gives general orders by throwing all keys.

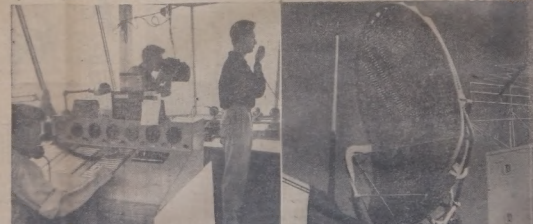

Radar screens aid in plotting the exact course of a plane. The top screen shows the craft from the time it enters the airport area until it lands on the runway as shown on the screen below.

National Film Board of Canada photos by Irving Dook.

Flying is no longer the hazardous adventure of a quarter century ago but is swift and sure as science can make it. In the great spaces of the open skies, traffic control is just as important as it is in the city's crowded streets.

Canada has been one of the countries foremost in developing safety standards that are now practised all over the world to ensure happy landings for millions of passengers.

To take care of the ever-increasing volume of flights, Canada has started schools in Winnipeg and Toronto to train young men as air traffic controllers. The six months course provides three months of theory followed by another three of practical experience in the tower.

Either visual or instrument flight regulations can be used in flying but most air transport lines use the latter. This basketry type of radar antenna is made of metal and acts as an electric eye to indicate the location of all craft within the airport area.

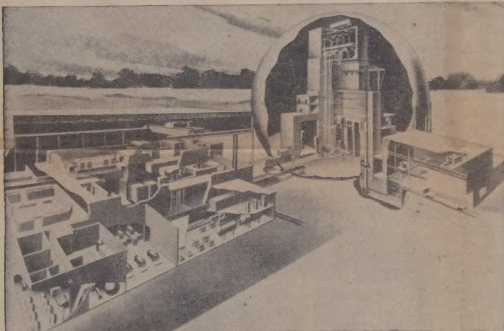

World Happenings in Pictures

BRITISH "TRADE-MARK" BLOWN UP WITH STATUE—As a did. The statue resembles the detonation of an A-bomb as it is blown up. It was regarded by the Egyptian government as a symbol of foreign imperialism. More than 800 Egyptians screamed their approval as the 80-foot statue, which stood at the northern terminus of the Ferdinand de Lesseps in Port Said harbor, the flagpoles were ordered to statue. The Egyptians said they would remove the flag—and they wayward, was destroyed.

TIBETAN LEADERS PHOTOGRAPH INDIAN CARVINGS—Panchen Lama, left, and Dalai Lama, nominal rulers of Tibet, adjust their movie cameras before photographing ancient Hindu and Buddhist carvings in the Elephanta Caves near Bombay, India. The trip is the first time the Lamas have traveled outside of Tibet since Red China took over the country six years ago.

DRESDEN FOR ATOMIC POWER STATION—Here is a cutaway, but contained in a steel sphere 150 feet in diameter. The turbine generator building, is at left and fuel handling facilities at right. The Dresden plant will be located on the Illinois waterway, 50 miles south-east of Chicago.

A BIG RUSH to catch the last train out of Montreal's Windsor Station bound for Toronto as the Canadian Pacific Railway and the Brotherhood of Railway Women could not get together on the railway's decision to do away with women on yard duty.

PINK-TAILED MONKEY UP TO TRICKS—This monkey business on states at St. Joseph, Mo., isn't part of any circus act but it probably might be to Mrs. Norma Lee Johnston's odd animal partner. Mrs. Johnston, a two-year-old chimpanzee from a St. Joseph, Mo., pet shop, Violet is taking lessons from Mrs. Johnston, a local instructor, who says the chimp is progressing faster than her human pupils of the same age.

How to Start a Nail
AS MANY a youngster or amateur craftsman has learned by painful experience, there are several wrong ways of starting a nail. There also is a correct way, which will avoid smashed fingers.

In the illustration by the National Safety Council, the wrong way is demonstrated in the upper right picture, with the painful result if the nail slips. It is to avoid holding the nail by the thumb and finger near the point of the nail.

If the thumb and finger are held over the head of the nail, as shown in the lower illustration, the digits will escape injury even though the nail slips. Of course, avoid having the thumb and finger swing against the head of the nail, for otherwise the hammer is likely to strike them as well as the head of the nail.

SKIRTS DOUBLED—From Paris, France, comes this admonition with two objects. Hanging garments from the 1937 round collection of Brigitte de Cannes, consists of a one-piece suit in white cotton, framed in bands of colorful print, with a matching skirt for town wear.

Eleventh down the line
A country that has health standards as high as Canada's falls down rather badly in its figure on child mortality. There are 10 other countries in the world whose statistics make a better showing in the survival of their babies. Medical authorities believe that this condition could be improved if the expectant mother were given better prenatal care, she should be under the care of her doctor or the local prenatal clinic all through the pregnancy, in order that she may have medical checkups and advice on diet and exercise.

FAMOUS SPORTS MOTHER—Dressed in casual shorts and playing with her nine-month-old son, Timmy, is Mrs. Pat McCormick, who was voted the outstanding woman athlete of the year in the U.S. Mrs. McCormick, who won two gold medals in diving at the recent Olympic Games, also was awarded the Babe Didrikson Zaharias Memorial Trophy as the leading woman amateur in the world.

SPARKLING HANDBAGS for evening show the elegance of this season's evening bag. Left, a bag in hand-beaded Beauvau, with raised sculptured floral motif in pale pastel; right, another handbag with fringe detail in a nostalgic romantic heart shaped silhouette.
